

A creative systems thinker & fixer could be just what you didn't know you needed.

I think I could help you solve stuff, and give you some bandwidth back.

- I've built & communicated technical products to businesses & engineers
- I've led teams building stuff that nobody knows how to build
- I've worked on, troubleshooted & fixed some of the highest priority / complex projects

And I'm now looking for an unusual role where I get to combine my weird skillset. My compass is impact, learning & fun.

Application

Work. There's a lot to say, but I'll keep it short

If you make me a virtual coffee we could talk about ...

How I learnt enough ML to help a team of AI experts work out how to make a smartphone diagnose skin conditions.

Or how I hid a doctor in an adjacent room to fake a consultation chatbot.

Or even how I discovered our brand name had been sold to the phone company Orange, and renamed a PLC in two weeks.

Or if we want to go way back, how I rethought domain search, increasing new revenue 20% overnight and accidentally creating a new industry standard.

A little bio:

I'm a Brit who met a Dane on a mountainside snowboarding. We have two kids, and live in an old house in Copenhagen. I enjoy mountain biking and dancing in the kitchen.

My story

Late 80s: first computer. Typing out BASIC from a magazine, syntax errors.

Late 90s: dot.com boom. Kids in bedrooms disrupting industries. I had to get involved - started making websites.

2003: Dot.com bust. No jobs. Got a foot in the door answering phones & made a better website in my free time. Pitched it, sales went up, joined the web team.

2004 - 2014: Learning by doing. Following impact across web, marketing, growth and product.

2016: Health-tech. The last industry to be disrupted - regulations, barriers, the lot. That's why I went.

2026. AI changes everything. Same feeling as the 90s.

Experience

Novo Nordisk: Mar 2020 - Feb 2026

Associate Product Director: Feb 2022 - Feb 2026

Senior product IC / fixer working on complex digital initiatives across the org.

- Created incubation unit. Wrote the playbook for customer-focused innovation.
- Used LLMs to automate lengthy compliance reviews. Product teams loved it. Execs weren't ready.
- Connected packaging to digital fulfilment on biggest ever pharma launch.

Senior Product Manager - Wegovy: Mar 2020 - Feb 2022

Built a digital patient solution for obesity medicine. Swimming against the tide.

- Persuaded senior stakeholders to bin their brief and talk to users instead.
- Introduced discovery, prototyping & iterative development to the organisation.
- Largest uptake for digital solution, scaled ways of working across the org.

LEO Innovation Lab - Product Lead / GM: Nov 2016 - Jan 2020

Startup incubator. Led small teams building crazy things across AI and consumer health.

- Parachuted into struggling mobile app team of 15. Earned trust, halved acquisition costs & increased activation 7x. Then closed product.
- Learnt enough ML to lead 10 AI engineers to build a camera-diagnosis app.
- First product lead to present mistakes / learnings at company all-hands. Made rapid prototyping & direct user interviews standard practice across all teams.

TwentyThree - Head of Marketing (contract): May 2016 - Oct 2016

B2B video platform. Stabilised a 10-person team, and rescued global launch on a 6-week deadline.

Opbeat - Head of Marketing: Nov 2014 - Apr 2016

A small APM startup backed by cofounders of Facebook, and Instagram.

- Defined the core product proposition and told the story.
- Grew grassroots meetups and created video engine to connect with developers.
- Trebled traffic and sign-ups in 12 months.

EuroDNS - Marketing Director: 2013 - 2014

B2B global domain marketplace. Did you know .aq is the domain for Antarctica?

- Restructured marketing department, rebooted all channels, repositioned dry domains with creative commons photography of the world.
- Reversed 4-years of sales decline, doubled organic traffic, halved bounce rate.

Independent Consultant: 2010 - 2013

Remote consultant. Clients included Host Europe (UK), EuroDNS (LUX), & Everplaces (DK).

- Content creation & SEO including interviews with EFF, Rand Fishkin, & Michael Palin.
- Spotted RaspberryPi before launch & created a partnership.

Experience cont.

UK2 Group - Head of Group Strategy: 2008 - 2010

Web hosting company. Troubleshooter for the CEO across London, Chicago & Utah offices.

- Owned strategy across pricing, product and marketing.
- Turned around underperforming US business unit.

Host Europe Group: 2003 - 2008

Europe's largest privately-owned web hosting provider. Later acquired by GoDaddy for \$1.8 billion in 2017. Learning the hard way: technical debt, waterfall, and PRINCE2.

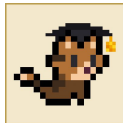

2006 - 2008: Head of New Media - managed all online channels (2M+ monthly visits)

2005 - 2006: Group Design Manager - led ecommerce, dominated SEO rankings.

2004 - 2005: Web Designer - rethought how domain search works, increasing revenue 20%.

2003 - 2004: Sales Exec - made an alternative website in my free time, sales went up.

Solo projects

kittenpm.com

A product training SIM inspired by Lemmings. Practice balancing product trade-offs in real time. Built with React, TypeScript & Phaser. Used Claude as my engineering team.

[TomBot](#)

A prototype AI trained on my CV. Built with Claude API and a RAG vector store.

Education

MA Information Technology University of Nottingham (2001-2002)

BSc Biological Sciences University of Birmingham (1998-2001)

Certificates:

IDEO U Human-Centred Systems Thinking (2024), Certified Scrum Product Owner
